

Test Management Services Help Major Passenger and Vehicle Ferries Operator with 98% Uptime Availability of Infrastructure

About the Client

The Client is the major operator of passenger and vehicle ferries in the UK. The Client provides various details about its services covering tour destinations, timetables, fares, service status of each route via its website and applications.

Key Requirements

The Client needed someone to help them with:

- Installation of test management tool
- Hosting and support Services
- Maintain staging and production servers
- Consultancy support related to JIRA and other Add-ons
- Backup of test assets

Technology Stack

Key Business Challenges

The Client in this case faced a few challenges:

- Lack of expertise in setting up test management and defect management tools
- Unstable requirements, no process was available to manage requirements
- No formal metrics were in place to measure the quality of the product
- Lack of visibility of product quality going ahead

Solutions Provided

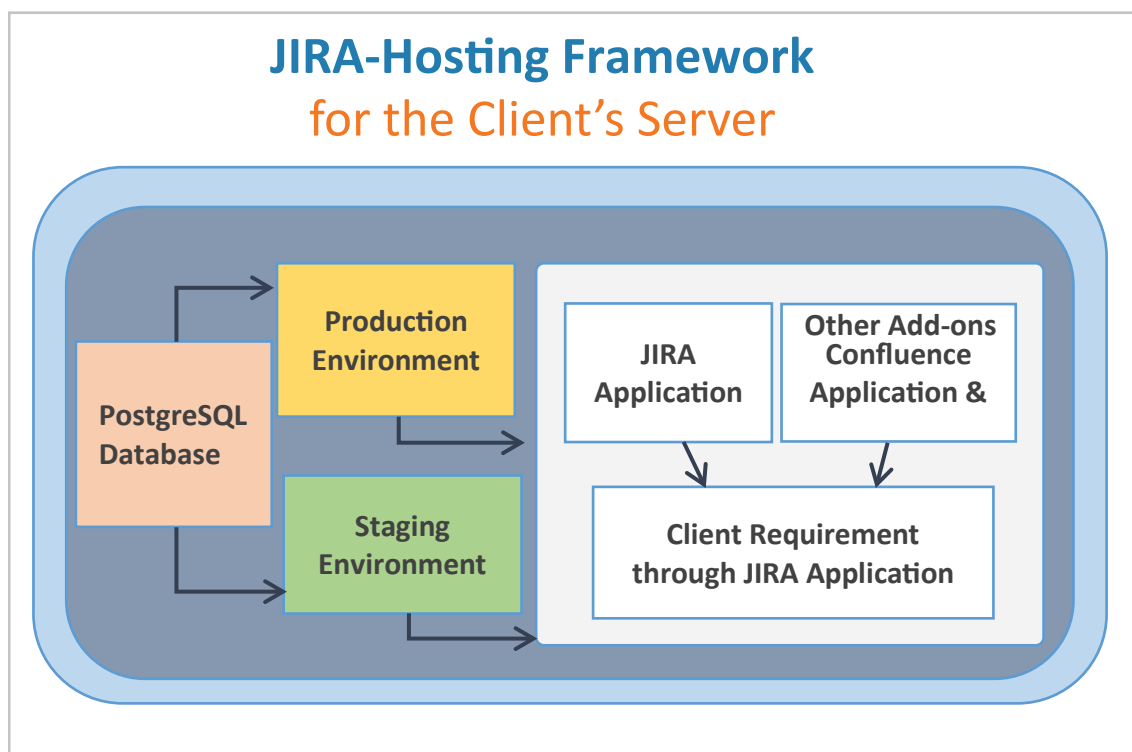

Cigniti's testing team employed their most efficient techniques to provide the following solutions:

- Procured third party hosting environment to setup JIRA & other add-ons like JIRA Capture, JIRA Agile and Confluence
- Configured Zephyr as a JIRA add-on for a cost-effective, highly sophisticated solution
- Created 50 users in JIRA & Zephyr to be used by the client's team
- Created widget in JIRA to capture blocked issues & dependencies
- Implemented scheduled JIRA backup process hosted on PostgreSQL database

Key Benefits

Under able guidance provided by Cigniti's able teams, the Client:

- Aggressive delivery schedules were met while allowing a seamless upgrade
- Ensured network availability and application availability
- Assured 98% uptime availability of the infrastructure
- Prioritised troubleshooting and resolution times by three levels
